All pages have the same simple structure...

1. Header - Navigation bar

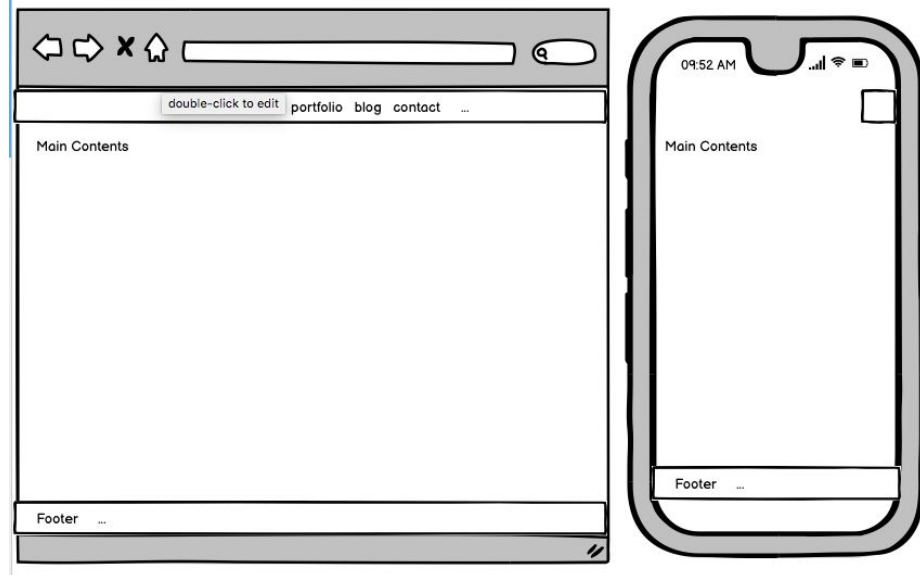

Easy to find different pages
Hamburger menu for mobile and tablet
which is located right side of the screen

2. Main Contents - Texts or images

Used wide space of the screen
Simple and easy to read all texts
(width: 80% of the screen)

3. Footer

Copyright

Components

Similar components are used across the all pages

1. `<nav>`

Guide to other pages / To get to know the site structure. This has to be very easy to find.

2. `<header>`

A group of introduced content, an introduction part, navigation. In addition to heading elements, Viewers can see what kind of website and contents it is in header section.

3. `<main>`

The main part of the document including texts and images, except for, footer information, header etc.

4. `<footer>`

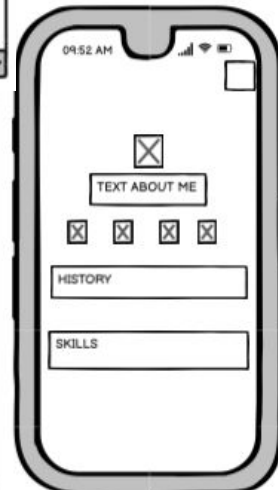

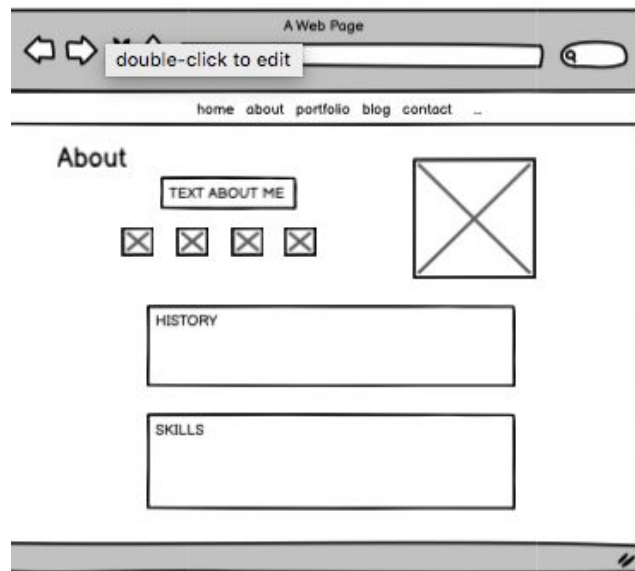

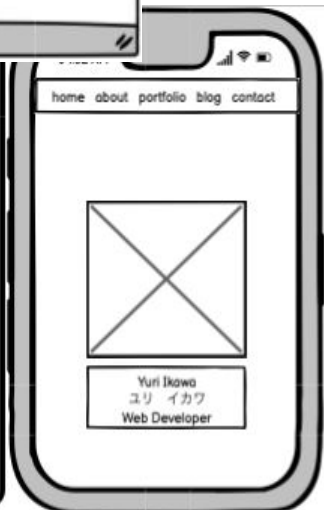

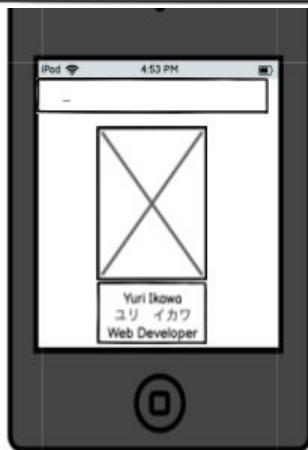

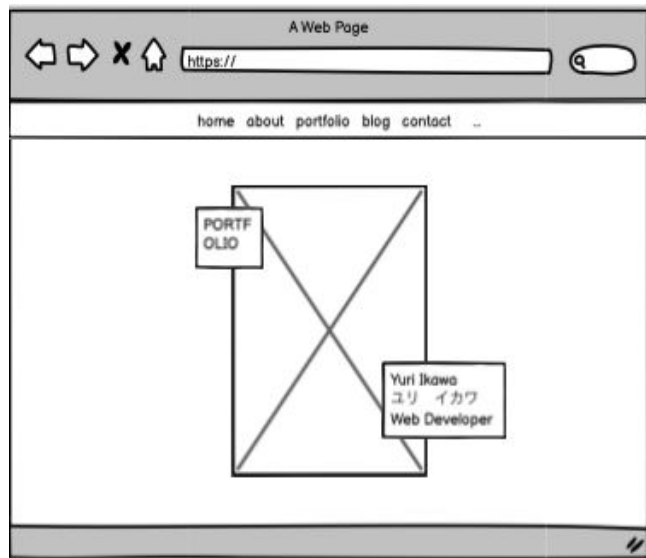

It contains information copyright information,

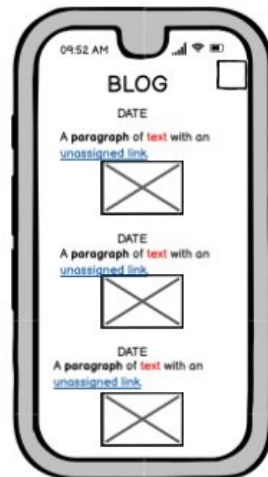

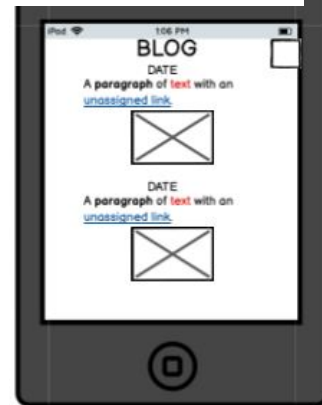

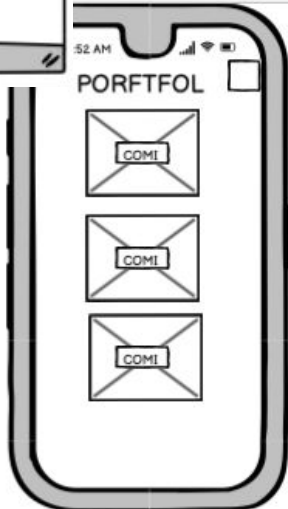

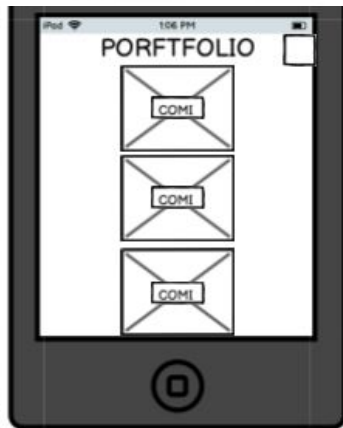

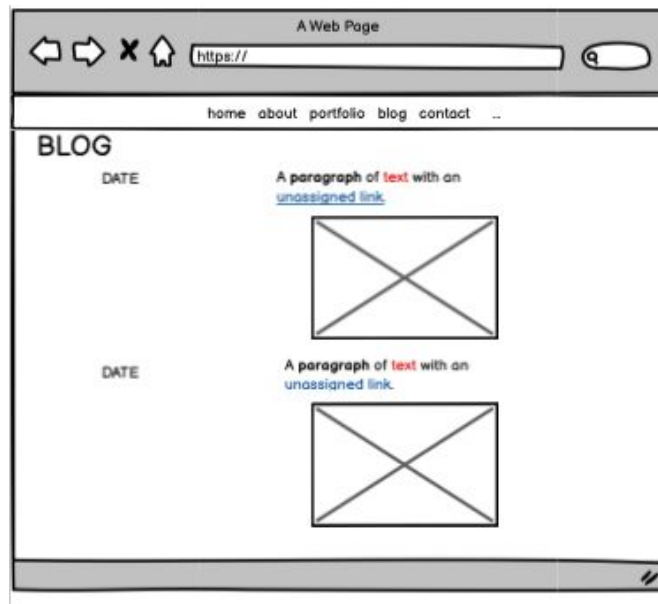

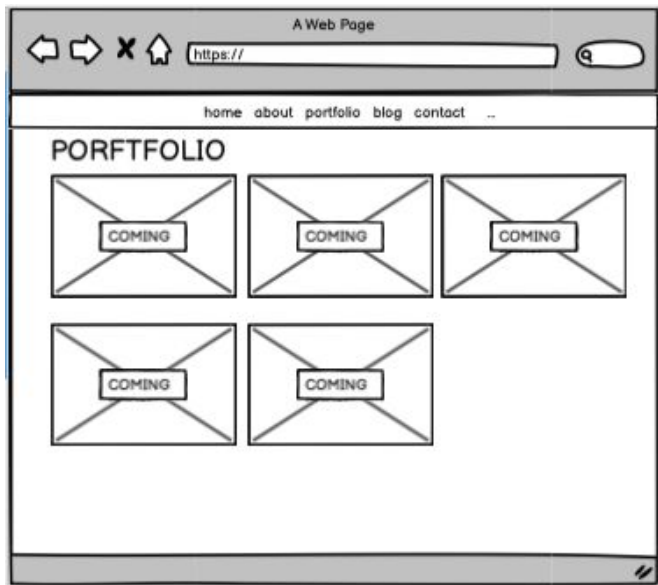

5. `<section>`

Used when there are no meaningful elements. Just for style.

Others...

`<p><table><button> <a><div>etc..`

HISTORY

SKILLS

Overall aesthetic

- Color : Three theme colors
 - Blue: #CCDCED - Accent color
 - Brown: #A58361 - Text
 - Beige: #EBE1D8 - Background color
- White space: Enough space for small screen and not too wide for big screen
- Responsive design (Mobile: max 599px Tablet: max 1024px Laptop: min 1025px)
- Visual balance for all pages: color and image size
- Fonts - Google fonts “Herr Von Muellerhoff” and “Playfair Display”

REVIEW

Challenges

- Responsive design (mobile first)
- Color and design decision (It's better to stick on one idea..)
- SRI
- Hamburger menu
- Time management

Possible improvements

- Basic design .. (Especially E-mail part..)
- Simple code
- More Animated design

Thank you!

Yuri Ikawa
